

# Save time, money and hassle with AcryliCon

## AcryliCon Industrial Flooring

### What do we do?

AcryliCon saves you time, money and hassle with our own **unique resin floors** that **out-last, out-perform** and are **easier to install** than anything else in the market.

We help you focus on your main job, without the worry and hassle of dealing with poor performing floors. We take **full responsibility** for design, manufacture and installation and provide a **10 year performance warranty** for complete peace of mind. By using regional offices, you get a **local service** and **tailor-made solution** with the **experience and support** of a global company.

*"The reduced maintenance and cost effectiveness of the floor make it a perfect solution for our hotel".*

Stale Ims, Clarion Hotel

*"The floor could be used almost immediately after installation...."*

Arne Falkfjell, Tine Dairy Group

Invented in Norway, made in Germany, installed Worldwide

# Your 7 hassle-free steps to a perfect floor

01

Book your survey now – Call 01480 276620

02

Our local experts will create a proposal and specify the correct product for your environment

03

We then work with you to create an installation plan that fits around your operation and aims to eliminate potential disruption

04

With the proposal agreed, we book in the installation date and begin production of the materials in our factory.

05

Our own specially trained and certified teams carry out the installation

06

Once you are completely satisfied with our work and the project signed off, you receive a full maintenance manual and warranty pack.

07

We will visit your floor annually to conduct a free health check

*"We've been really impressed, it's very durable and easy to keep clean."*

Jack Smallman, South Downs Venison

*"Following your excellent work at Bentley's, I hope to be able to use your services again soon."*

Cyril Lommaert, Bentley's Oyster Bar and Grill, London

## 7 ways AcryliCon Floors will save you money

**1. They simply last longer** – your floor will not degrade, become brittle or porous with use. Proven real world life-expectancy well over 20 years. Ask to see our references.

**2. Quick and easy to install** – unlike other resin floors, which can take days or weeks to cure and become chemically resistant, AcryliCon takes under 2 hours - so you can get back to work on an AcryliCon Floor almost immediately after installation.

**3. High Compressive Strength** – AcryliCon has outstanding durability and cleanability - similar to Stainless Steel - which makes the floor easy to keep clean and less likely to mark or wear.

**4. Permanent Bond** – with each layer of the system chemically fusing together and our primer penetrating deep into the substrate, you have no risk of delamination – Guaranteed.

**5. HSE Approved Slip-resistance** – to keep your staff safe and your company legal.

**6. Simple Maintenance** – due to AcryliCon's unique ability to chemically bond and our quick cure time of under 2 hours - repairs are simple and effective.

**7. Full 10yr Performance Warranty** – covering design, manufacture AND installation. In the unlikely event your floor fails to perform, we fix it. Simple.

How much time would you save, if you didn't ever have to worry about your floors again?
